

Peter Haßler

RELEVANT WORK EXPERIENCE

Software Engineer 2023 - 2024
Tourlane GmbH, Berlin

- Steered the monorepo committee; drove continuous deployment, compatibility checks, CSP, and error-resilience improvements.
- Led architecture/design reviews and mentored engineers to scale delivery quality across teams.
- Built and maintained public web apps and a BFF in an Nx monorepo (TypeScript/Next.js, Fastify, tRPC, PandaCSS).
- Strengthened CI/CD for safe, compatible releases; improved resilience with robust error handling and retries.
- Set up production monitoring and alerting (Prometheus, Grafana); resolved complex defects and performance issues.
- Designed cross-team i18n workflows and tooling with Phrase to prevent production issues.

Team-Lead Web-Frontend 2023 - 2024
Gaia Technologies GmbH, Berlin

- Thrived in a fast-paced startup, solving complex challenges under tight deadlines.
- Primarily developed and maintained a Next.js frontend application.
- Contributed to the backend application, using Ruby On Rails, MongoDB, Hotwire.
- Set up and maintained continuous delivery / continuous integration pipelines.
- Mentored other frontend developers.
- Solved architectural challenges to improve time to market.

Team-Lead Web-Frontend 2021 - 2023
Good Hood GmbH (nebenan.de), Berlin

Recruited and led a cross-functional team of frontend/QA engineers for one of the largest social networks for neighborhoods in Europe.

- Built multiple multilingual web based apps serving customers in three different countries.
- Set up monitoring, processes and automated pipelines to continuously ensure the quality of our services.
- Set up inner-team processes to further ensure high quality, low rate of defects and fast lead times.
- Guided team members in software and quality assurance to progress into higher-level positions.
- Collaborated with the product team to help plan and prioritize product features to drive product innovation.
